SUBJECT INDEX	157-159
---------------------	---------

Bakers is one of Scandinavia's leading manufacturer of bakery, pastry and restaurant utensils - with development and production facilities in Sweden, Finland and Norway - and our facility for non stick coating is the first of its kind in Northern Europe. Bakers can now offer automated production of non stick coating on different products – trays, tinsets, bread pans, pizza pans and containers.

Bakers continuously makes significant investments in new and improved technology and manufacturing equipment, not least to meet the increasing demand for custom-design and custom solutions. Due to a flexible production, Bakers can offer a wide range of basic utensils as well as designed and customised items for various lines of business.

Cleaning with air and water ionization.

Hygienic and germ free without chemicals!

The experience of air feels fresher after a thunderstorm is not a coincidence. During a thunderstorm oxygen molecules are charged with electricity allowing impurities to decompose in the air. Therefore, pollution do not reach the environment to the same extent, thus facilitating nature's own process.

ExpoClean technology is based simply on restoring nature's own cleaning processes!

Nature have always lived with this process, which raises welfare and is completely harmless!

Ionization creates electrically charged ions.

The negatively charged ions cleans the air from pollution and bacteria and makes the air fresh.

Neutral oxygen molecules.

Oxygen molecules return to nature. Degraded particles are cleaned in the traditional manner.

*Our planet has created the process
- we have put the idea in to action so that you
can benefit from it!*

ExpoClean-products
on page 154.

We have products for bacterial control for most areas and occasions.

Units with airborne system can be used on work tables for food handling or in a cabinet with knives. The airborne system also acts as a purifier in e.g. garbage rooms, toilets or work rooms.

ExpoClean water-based systems can be used for most types of cleaning with wet wipes suited for hands, benches, machines and tools etc.

Our innovative quality grilling grids, containers and trays creates a smooth, efficient and condensation free food preparing – achieved through an extreme fast and effective heating in combination with a high and constant heat distribution.

Chicken or salmon fillets, potato gratin, lasagna, oven pan cakes or steaks - this unique technique gives an improved frying result without losing the moisture content of food product. Furthermore, the non stick coating enables frying, grilling and baking totally or partly without added fat.

Three grilling grids, containers or trays in your oven replace a traditional frying table! Grilling or frying time is approximately from 6 to 12 minutes depending on food product. The unique characteristics of the innovative products enables a fast heating up time and a short cooking time which reduce the amount of needed energy when preparing food.

The non stick coating is an environmentally friendly material which is easy to keep clean.

Save economy
and time and increase
customer satisfaction by easily
rationalize your kitchen routines
and offer an improved food quality.

In addition, you get a
better working environment.

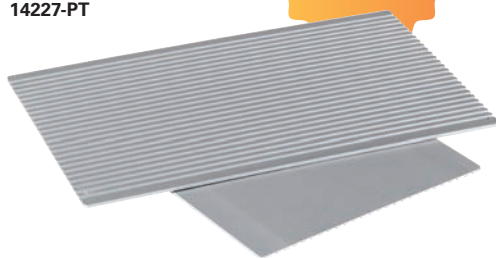

The advantages are easy
to spot!

*Our automated system
for non stick-coating gives our
customers more options and alternatives
concerning baking trays and tinsets!*

Bakers manufactures trays and tinsets on request!

Bakers is developing and manufacturing a wide variety of trays and tinsets. Here you can see some examples of products that have been developed together with our customers according to their special needs.

We look forward to manufacture according to your needs and to find the right solution for your situation.

Bakers cleans, repairs and recoat.

Heat, fat and sugar wears out the rubber silicone surface over long periods of usage.

Bakers helps you to recoat your old baking trays and tinsets and makes them look and feel like new ones.

Please contact us to get more information about the non stick coating of machine parts.

Welcome to Bakers!

Take good care of your coated trays!

- Stack trays carefully to avoid scratches.
- Wash trays in warm water if needed.
- Dry trays in an oven in 200°C.
- Do not use a wet tray when baking.
- Do not wash trays in a dishwasher.
- Do not scratch the surface of the tray.
- Avoid to put sugar on the tray.
- Silicone coating wears out over long periods of usage and loses its characteristics.

Let Bakers recoat your trays regularly in order to achieve a good hygienic level and economy.

WE ARE LOOKING FORWARD
to supply you!

Bakers is one of Scandinavia’s leading manufacturer of bakery, pastry and restaurant utensils. The Baker Group includes manufacturing companies in several different areas such as environmentally friendly cleaning chemicals, baking- and work tables.

In our endeavor to help our customers, to conduct our continued product development and to ensure high quality we can now offer automated production of non stick coating. This gives our customers more options and alternatives for the treatment of for example baking trays, tinsets and machinery.

The food safety requirements of proper food handling have been increasing dramatically during the last years in the food industry. We consider of course these aspects important and a lot of emphasis has been put on food safe, colour coded and traceable products in our new product catalogue. It is our pleasure to assist you with colour-/cleaning zone certification of your production units.

We proudly present our new product catalogue that includes a number of interesting new products, special articles and a well-considered basic product range.

Among our new products you will find ExpoClean – air and water disinfection without chemicals! A new, efficient and environmentally friendly tool for everyone in the food industry. You will find information about ExpoClean on page 72 and our ExpoClean products on page 154.

On the following pages you will find everything you need. And then some more!

Welcome to the world of Bakers!

Several of the pastries, breads and desserts presented and pictured on cover and in the catalogue are designed and created by PM & Friends, Växjö, Sweden.

BAKERS
general selling conditions

Prices
All prices are in Euro. Bakers AB reserves the right to change prices for products at any time due to any cost increases that are outside our control such as raw material prices and currency fluctuations.

Product range
Bakers AB reserves the right to make some minor changes to the products in this publication if needed.

Terms of delivery
The products are always delivered Ex Works Seller's depot (Incoterms 2000) unless stated otherwise.

Transport damages
Inspect all goods on receipt, and note visible damage and shortage on the freight bill. Obtain carriers signature before signing.

Back orders
Items that are temporarily out of stock, will be back-ordered, and delivered and shipped, as soon as possible.

Terms of payment
30 days net from the date of invoice.
Interest rate will be charged on overdue payments at the rate stated on the invoice.

Complaints and refunds
Complaints have to be reported within 8 days from the delivery of the products. Refunds are accepted only after contact with Bakers AB.
In the case when accepted refunds do not derive from Bakers AB's mistake, 85 % of the charged amount on the invoice will be credited.
All the refund items should be returned in their original packaging. All products outside Bakers AB's product standard range can not be refunded.
